DETAILED ACTION

Claims 1-7 and 19-21 are pending.

Claims 8-18 and 22-51 have been cancelled.

Priority

Applicant is requested to update the status of the parent application in the first line of the specification.

Information Disclosure Statement

The information disclosure statement filed 7/31/03 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed.

Specifically, all the references have been considered except for B1-B3, B46 and B48. These were not filed in the parent application. An initialed copy of the PTO-1449 is enclosed.

The IDS filed 3/15/04 has been considered and an initialed copy of the PTO-1449 is enclosed.

Drawings

The drawings filed 7/31/03 are approved.

Claim Rejections - 35 USC § 112

Claim 19 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 19 refers to the TPO-mimetic peptide of Table 16. Table 16 is not directed to TPO-mimetic peptides--Table 6 is.

Conclusion

Claims 1-7 and 20-21 are allowed.

The prior art neither teaches nor suggests a compound comprising an Fc domain linked to a TPO-mimetic peptide wherein the peptide is 2-40 amino acid residues in length and is not naturally occurring TPO. A combination of the closest prior art, WO98/24477 and WO 97/28828, show an IgG linked to a protein (IL-1ra) not a peptide. There is no suggestion in the prior art that a small peptide of 2-40 amino acids could successfully be added to and IgG.
